

NIS Quality, Safety, Health and Environment Policy

NIS Limited is an engineering organisation who provides bespoke, pragmatic, design and manufacturing services to a range of clients working across quality driven sectors. Our proactive approach generates organisational improvements by continually improving our management system and performance by working to agreed objectives.

The promotion of, and adherence to, our core values (Respect, Protect, Commit and Inspire) and our procedures ensures that our system will comply with, as a minimum, specific legal, regulatory requirements of our business and BS EN ISO 9001:2015.

Through communication and participation of our employees we are committed to satisfying all requirements. This will provide a safe and healthy environment through the hierarchy of controls that promotes good physical and mental health for our people, stakeholders and to the general public when carrying out our activities in accordance with BS ISO 45001:2018.

Our environmentally responsible behaviour is demonstrated by our activities and the actions of our people to protect the environment and prevent pollution in fulfilling our compliance obligations under BS EN ISO 14001:2015.

Our integrated management system is maintained in line with the above standards and performance is measured through proactive internal and external audit activities and management review.

Procedures are in place to provide the framework for setting and reviewing quality, safety and environmental targets and objectives.

This policy is reviewed, documented, implemented and communicated to all employees and is available to the public and any interested parties.

The Managing Director is ultimately responsible for the operation of the integrated management system within the company.

Gill Marsden
Managing Director
